DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-7, 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Toshiaki (JP 01012018).

Regarding claims 1-3, Toshiaki discloses a process for producing a metallic honeycomb body comprising for a catalytic converter forming passages for an exhaust gas: comprises the following steps: forming a void (50-52) in a metal foil and subsequently structuring the metal foils at least partially; processing the at least partially structured metal foils with a process selected from the group of stacking and winding to form a honeycomb structure with passages for conducting a gas therethrough (Figure 2), and to place the at least one metal foil such that the void defines a receptacle extending into an interior of the honeycomb structure and being configured to receive therein a sensor device (40); providing a tubular casing (11) with an opening and introducing the honeycomb structure into the tubular casing, with the opening at least partly aligned with the receptacle; and connecting the metal foils and the tubular suitable joining technique (Figure 5).

Regarding claims 6-7, 9 Toshiaki discloses stacking the metal coils (Figure 3), and then winding (Figure 2); as well as the voids being U shaped recesses (Figure 2); wherein the profile follows a profile of the metal foils (Figure 2).

Art Unit: 3726

Regarding claim 10, Toshiaki discloses inserting the sensor having a shape corresponding to the receptacle (Figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5, 8, & 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toshiaki.

Toshiaki discloses the claimed invention except for the specific dimensions as claimed. It would have been an obvious matter of design choice to form a catalytic converter as disclosed by Toshiaki having the particular dimensions claimed, since applicant has not disclosed that such dimensions solve any stated problem or are for any particular purpose.

Conclusion

The prior art made of record on the attached PTO-892, and not relied upon is considered pertinent to applicant's disclosure.
